

SOAP DOSER. ELEGANCE Ref. 04035

Product description

- Metallic ABS material.
- Metallic Embellisher.
- Metallic polyethylene tank.
- Gel/disenfctant dispensing.
- Wall mounted and with security lock.
- With push button.
- Tank capacity: 1 liter.
- Net product weight: 0,99 kg.

Technical specifications:

Dispenser made entirely of ABS material, metallic color, receives inside a polyethylene tank with a filling capacity of 1 liter soap (vegetable or synthetic). The inner tank is filled by opening the housing by means of a safety lock located on the top of the product. On its front, it has a viewfinder in the form of oval for soap filling control. The push-button lid of the soap dispenser is made of ABS thermoplastic material.

The dispenser operates by sensor. The installation is done attached to the wall using four screws with universal wall stud, each of them located on the mounting bracket of the dispenser.

The soap dispenser model is ELEGANCE® 04035.

Technical Characteristics

Product specifications:

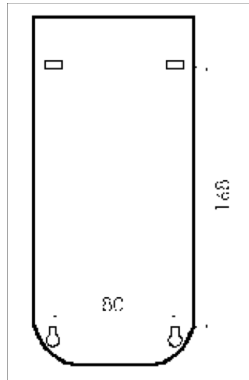

- Type of deposit material: Polyethylene
- Type of cover material: Metallic ABS plastic.
- Capacity: 1 liters.
- Dispensation: Gel/disenfctant.
- Wall mounted installation.
- Power using 4 batteries type C-LR14 of 1.5 V.

Packaging Specifications:

- Packaging dimensions: 285 x 140 x 131 mm
- Weight with packaging: 1.16 kg.
- Screws and dowels included.

Certifications.

Mounting Template:

Setting-up:

In toilet areas with a high frequency of use, the recommendation is to install a dispenser per sink. In toilet areas with a lower frequency of use, the recommendation is to install a dispenser for every two sinks or two dispensers for each three sinks.

Functioning:

Sensor activated.

Cleaning:

Pass wet cloth with water and neutral detergent, never abrasive. Dry with a clean dry cloth that does not give off fluff.
