

IMPRÄGNOL®

Bionic Care IMPREGNATION for outdoor, sport, and functional textiles

Inspired by nature, the fluorine-free, patented, bionic active ingredient in this impregnation product from IMPRÄGNOL gives long-lasting protection against wetness and dirt when applied to your textiles in the wash.

- For clothing, rucksacks, tents, and washable shoes.
- Reactivates the membranes: weather protection that's as good as new.
- Long-lasting protection even for heavily used areas.
- Does not soften the fibres: clothing retains its proper texture.

Skin tolerance dermatologically confirmed.

Impregnation product for use in the washing machine.
Suitable for hand wash as well as sponge application on tarpaulins, rucksacks, and awnings.

Application Washing machine

- Remove all detergent residues from the detergent drawer.
- Place clean clothing (maximum 2.5 kg) into the drum.
- Add IMPRÄGNOL Bionic Care impregnation product to the main wash compartment.
Dosage: 100–150 ml per kilogram of textile.
- Select the impregnation or delicates programme (30°C/40°C).

IMPRÄGNOL®

Hand wash

Make up an impregnation solution in 10 L of water (dosage: 100–150 ml per kilogram of textile). Add a maximum of 2.5 kg of textiles and soak for 20 minutes. Then squeeze out carefully.

Sponge application

First, moisten the textile being treated. Next, apply the undiluted impregnation product onto tarpaulins, rucksacks, awnings, etc. with a sponge.

The impregnation effect will increase with the application of heat after treatment.

We recommend putting the textile (wet or after air-drying) in the tumble dryer. Alternatively, rucksacks, tarpaulins, etc. can be ironed or blow-dried.

Please note textile manufacturer's care instructions.

Important information

- Keep out of the reach of children.
- Avoid contact with eyes. If product gets into the eyes, rinse thoroughly with water.
- Protect from frost.
